Storm Surge is the abnormal rise of water generated by a storm's winds. This hazard is historically the leading cause of deaths in the United States in hurricanes. The destructive power of storm surge and large battering waves can result in large loss of life and destruction along the coast. Storm surge can travel several miles inland, especially along bays, rivers, and estuaries. Watch this video to learn about storm surge and how to stay safe! http://bit.ly/1BdlXLi #HurricanePrep #ItOnlyTakesOne

Storm surge is the number one threat to life and property when it comes to hurricanes and strong coastal storms. The National Hurricane Center will be issuing a prototype watch/warning graphic this season to help the public better understand the dangers. http://1.usa.gov/1BMmBk5 #HurricanePrep

Twitter:

@NHC_atlantic will issue prototype watch/warning graphic for storm surge. http://1.usa.gov/1BMmBk5 #HurricanePrep

Prototype Storm Surge Watch/Warning Graphic*

Hurricane Zelda Advisory 12 Issued: Fri Jul 04 2014 8 PM EDT

Storm surge is often the greatest threat to life and property from a hurricane. Not only can it cause major damage to your home, it poses a significant threat for drowning. Be sure to stay away from floodwaters. A mere six inches of fast-moving flood water can knock over an adult. It takes only two feet of rushing water to carry away most vehicles - including pickups and SUVs. Turn Around, Don't Drown! tadd.weather.gov/ #FloodSafety

Don't wait for a Hurricane or Tropical Storm Warning to secure your boat. By then it's too late to safely work on a dock. Listen to weather forecasts and plan ahead. Haul out your boat or add additional lines as soon a hurricane or tropical storm watch is issued. This will typically give you 48-hours before the anticipated onset of storm winds and will allow you to safely secure your boat. http://1.usa.gov/1H3Nmm1

Twitter:

Boaters: Secure your boat for a hurricane BEFORE a warning is issued. http://1.usa.gov/1H3Nmm1

If you have pets, do you know what you would do with them during a hurricane? Prepare for the worst by assembling an animal emergency supply kit and developing a pet care buddy system. Whether you decide to stay put in an emergency or evacuate to a safer location, you will need to make plans in advance for your pets. http://www.ready.gov/caring-animals

Twitter:

What would you do with your pets during a hurricane? Make a plan in advance. #HurricanePrep http://www.ready.gov/caring-animals

Facebook:

During a hurricane, you may have to evacuate to a shelter. If you are going to a public shelter, it is important to understand that animals may not be allowed inside. Plan in advance for shelter alternatives that will work for both you and your pets; consider loved ones or friends outside of your immediate area who would be willing to host you and your pets in an emergency.
